

## Books

- how to find and order books

Books and other printed material can be found in the library catalogue, ALIS. The DTU library catalogue is a joint catalogue for the Technical Information Center of Denmark, DTU Library, and a number of the DTU department libraries.

ALIS can be found through [portalen.dtu.dk](http://portalen.dtu.dk), via [www.dtic.dtu.dk](http://www.dtic.dtu.dk), or directly at [alis.dtv.dk](http://alis.dtv.dk).

### Content in ALIS

All printed books and printed journals at DTU Library are registered in ALIS, as well as most of the printed books and journals from the DTU department libraries. As default you only search in the material found at DTU Library, but it is possible to change the database and search in the content of both DTU Library and DTU department libraries or in the individual department libraries alone.

### Orders in ALIS

You have to be registered in our library system to order books and paper copies of articles from the library. You can be registered online via [alis.dtv.dk](http://alis.dtv.dk) or show up at the library desk.

Loans are free of charge. You can pick up the book at the library or have it sent to you at a fee – please check the [price list](#) at the library website.

### Special order

It is possible to order books from another library via the special order form found in ALIS. Fill in the form if you cannot find a specific book in ALIS and it will be ordered to you from another library. Loans from other libraries are free of charge for DTU staff and students.

It is also possible to order articles from journals not available at DTU Library via special order. Copies of printed articles cost DKK 35 per article for DTU students and DKK 70 for members of staff.

For other users - please check the [price list](#) at the library website.
